THIS IS FOR THE HEALTH INTERVIEW FOR {SP}.

There are a few additional things I need to cover before we continue with the interview. Taking part in this interview is voluntary. {You/SP} may choose to skip any question {you don't/SP doesn't} wish to answer or end the interview at any time without penalty. We are required by Federal law to develop and follow strict procedures to protect the confidentiality of {your/SP's} information and use {your/SP's} answers only for statistical purposes. I can describe these laws if you wish. On average, the interview will take less than {INTERVIEW DURATION} minutes. {At the completion of the interview, you {or SP} will be given a \${INCENTIVE} debit card as a thank you for answering these questions.} Do you have any questions before we continue?

a. Do you agree to {allow SP to} proceed with the interview {for SP}?

YES .....	1
NO .....	2

**b. We can do additional health studies by linking the interview and exam data to vital statistics, health, nutrition, and other related records. May we try to link {your/SP's} survey records with other records?**

YES .....	1
NO .....	2

**IF RESPONDENT NEEDS MORE INFORMATION ABOUT LINKING, READ:**

[I understand your concern.] By matching NHANES data with other health-related records, researchers can study health conditions like heart attacks and diabetes in depth. They can also better understand health care use and health care costs for all Americans. These findings will help doctors assist patients in making smart choices. These types of studies will not be possible if we don't have your permission for the linkage. I can share some examples with you if you like. May we try to link your/the SP's survey records with other records?

**IF ASKED FOR EXAMPLES, READ:**

- By linking the data from our study to data from the U.S. Department of Housing and Urban Development, we learned the association between housing environment and the high level of lead in children's blood.
- By linking the Vitamin D levels measured from our participants' blood to Medicare data, we learned that higher vitamin D in the blood lowers the risk of broken bones.
- By linking the behaviors reported by our participants to the National Death Index database, we learned that adults who exercise, eat healthy diets, and do not smoke have a lower chance of dying at a young age.

**IF ASKED FOR ADDITIONAL EXPLANATION OF DATA LINKAGE:**

**Data linkage**, also known as record linkage, combines your information from at least two different sources (e.g., NHANES data and Medicare data). This is done only for statistical purposes.

If you agree to data linkage, we will combine the information we collected from you during this survey with records from other organizations (e.g. the Centers for Medicare and Medicaid Services). Once the linkage is completed, personal information that identifies you such as your name, street address, and phone number, will be removed from the linked file before the file is made available for analysis. The linked file will only be used for statistical purposes.

RIQ.337a/b ADMINISTER INTERVIEW CONSENT SCREEN TO 16-17 YEAR OLD SP.  
THIS IS FOR THE HEALTH INTERVIEW FOR {SP}.

Taking part in this interview is voluntary. You may choose to skip any question you don't wish to answer or end the interview at any time without penalty. We are required by Federal law to develop and follow strict procedures to protect the confidentiality of your information and use your answers only for statistical purposes. I can describe these laws if you wish. On average, the interview will take less than 30 minutes. {At the completion of the interview, you or your parent or guardian will be given a \${INCENTIVE} debit card as a thank you for answering these questions.}

a. Your parent/ guardian has already given permission for you to participate. Do you agree to proceed with the interview?

YES ..... 1  
NO ..... 2

b. **We can do additional health studies by linking the interview and exam data to vital statistics, health, nutrition, and other related records. May we try to link your survey records with other records?**

YES ..... 1  
NO ..... 2

**IF RESPONDENT NEEDS MORE INFORMATION, READ:**

[I understand your concern.] By matching NHANES data with other health-related records, researchers can study health conditions like heart attacks and diabetes in depth. They can also better understand health care use and health care costs for all Americans. These findings will help doctors assist patients in making smart choices. These types of studies will not be possible, if we don't have your permission for the linkage. I can share some examples with you if you like. May we try to link your/the SP's survey records with other records?

**IF ASKED FOR EXAMPLES, READ:**

- By linking the data from our study to data from the U.S. Department of Housing and Urban

Development, we learned the association between housing environment and the high level of lead in children's blood.

- By linking the Vitamin D levels measured from our participants' blood to Medicare data, we learned that higher vitamin D in the blood lowers the risk of broken bones.
- By linking the behaviors reported by our participants to the National Death Index database, we learned that adults who exercise, eat healthy diets, and do not smoke have a lower chance of dying at a young age.

**IF ASKED FOR ADDITIONAL EXPLANATION OF DATA LINKAGE:**

**Data linkage**, also known as record linkage, combines your information from at least two different sources (e.g., NHANES data and Medicare data). This is done only for statistical purposes.

If you agree to data linkage, we will combine the information we collected from you during this survey with records from other organizations (e.g. the Centers for Medicare and Medicaid Services). Once the linkage is completed, personal information that identifies you such as your name, street address, and phone number, will be removed from the linked file before the file is made available for analysis. The linked file will only be used for statistical purposes.

**HELP SCREEN:**

**Assurance of Confidentiality** – We take your privacy very seriously. All information that relates to or describes identifiable characteristics of individuals, a practice, or an establishment will be used only for statistical purposes. NCHS staff, contractors, and agents will not disclose or release responses in identifiable form without the consent of the individual or establishment in accordance with section 308(d) of the Public Health Service Act (42 U.S.C. 242m(d)) and the Confidential Information Protection and Statistical Efficiency Act of 2018 (CIPSEA Public Law No. 115-435, 132 Stat. 5529 Sec. 302)). In accordance with CIPSEA, every NCHS employee, contractor, and agent has taken an oath and is subject to a jail term of up to five years, a fine of up to \$250,000, or both if he or she willfully discloses ANY identifiable information about you. In addition to the above cited laws, NCHS complies with the Federal Cybersecurity Enhancement Act of 2015 (6 U.S.C. §§ 151 and 151 note) which protects Federal information systems from cybersecurity risks by screening their networks.

**Public reporting burden** for this collection of information is estimated to average 45 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

**Send comments** regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer; 1600 Clifton Road, MS D-74, Atlanta, GA 30333, ATTN: PRA (0920-0950).
